SUBJECT: MEETING REPORT FOR THE NOVEMBER 29, 2001, MEETING WITH
KAISER ALUMINUM

On November 29, 2001, U.S. Nuclear Regulatory Commission (NRC) staff members met with representatives of Kaiser Aluminum (Kaiser) to discuss additional site characterization activities associated with Kaiser's Phase 2 decommissioning efforts. Attached is the meeting report documenting this meeting.

Attachment: Meeting Report

Docket: 040-02377
License: STB-472

Date: November 29, 2001

Time: 8:00 am to 10:00 am

Place: U.S. Nuclear Regulatory Commission
11555 Rockville Pike
Rockville, MD

Purpose: To Discuss Various Issues Related to Kaiser Aluminum's Phase 2 Decommissioning Plan

Attendees:

NRC

John Buckley 301-415-6607
Jean Claude Dehmel 301-414-6619
Blair Spitzberg (via teleconference)
Robert Evans (via teleconference)

Kaiser

Bill Vinzant 225-231-5116
Max Scott 225-578-4400

Earth Sciences

Andy Lombardo 724-733-3000
Chuck Beatty 724-733-3000
M.D. Tourdot 724-733-3000

Background:

On April 4, 2000, the U.S. Nuclear Regulatory Commission (NRC) approved the Phase 1 decommissioning Plan (DP) for the Kaiser Aluminum (Kaiser) facility located at 7311 East 41st Street, Tulsa, Oklahoma. In Phase 1, Kaiser has been remediating land areas adjacent to the Kaiser property. Kaiser submitted the Phase 2 DP on May 25, 2001.

Discussion:

On November 7, 2001, Kaiser submitted a technical report on additional site characterization activities designed to identify additional radioactive material located beneath structures located on Kaiser property. Historical data and information gathered during Phase 1 decommissioning activities indicates that additional residual contamination exists beneath several currently paved areas and building floor surfaces on Kaiser property. During the meeting, Kaiser discussed historical data, its site characterization plan, and its plans for integrating remediation of the soil beneath the paved areas and building floor surfaces, into the Phase 2 DP. Kaiser anticipates beginning site characterization field activities in January 2002

Actions:

1. Kaiser will submit a historical site assessment to NRC in December 2001.
2. Kaiser will submit a site characterization field work plan to NRC in December 2001.

Attachment

3. Kaiser will provide a schedule for site characterization activities to NRC, before beginning work. NRC plans to perform a site inspection during site characterization activities.

4. Upon completion of site characterization activities, Kaiser will prepare an addendum to the Phase 2 DP. The addendum will integrate the decommissioning activities for the soil beneath the paved areas and building floor surfaces, into the Phase 2 DP. Kaiser plans to submit this addendum to NRC in May 2002.
